

Daniel Alexander Santacruz Aquino

Systems Engineer | Full-Stack Developer

danielsantacruz0288@gmail.com | [Linked In](#) | [github](#) | +503 77423721

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building scalable web applications and backend systems across government and private sectors. Skilled in designing clean REST API architectures, leading technical migrations, and delivering maintainable full-cycle solutions. Hands-on experience with cloud infrastructure on both AWS (Amplify, EC2, S3, SES) and GCP, containerized deployments with Docker and Kubernetes, and production-grade development using TypeScript, Python, Angular, and NestJS. Comfortable working across the entire stack — from database design to responsive UI — with a strong focus on code quality, performance, and team collaboration.

TECHNICAL SKILLS

Languages: Python · TypeScript · JavaScript · Java

Backend: FastAPI · NestJS · Node.js · ExpressJS · Hasura (GraphQL) · Keycloak (IAM & Auth)

Frontend: React · Angular · Angular Material · PrimeNG · Ng-Zorro · PrimeFlex

Databases: PostgreSQL · MySQL · SQL Server · MongoDB · Firestore · TypeORM · PGVector

Cloud & DevOps: AWS (Amplify, EC2, S3, SES) · GCP · Docker · Docker Compose · Kubernetes · CI/CD Pipelines

AI & Tools: LLMs · RAG Pipelines · Prompt Engineering · GitHub · GitLab · Postman · Figma

Methodologies: Scrum (Certified Scrum Foundation) · REST API Design · Microservices · Agile

WORK EXPERIENCE

Full Stack Developer · Ministry of Foreign Affairs — El Salvador *May 2024 – Present*

Stack: TypeScript · NestJS · Angular · PostgreSQL · Hasura (GraphQL) · Keycloak · Docker · Angular Material · PrimeNG

- Led the migration from a legacy PHP Symfony monolith to NestJS microservices, significantly improving system scalability, maintainability, and deployment flexibility.
- Designed and implemented RESTful APIs with clean, decoupled service boundaries, reducing integration friction between frontend and backend teams.
- Implemented Hasura GraphQL over PostgreSQL to accelerate data querying and improve cross-service data accessibility.
- Integrated Keycloak for centralized identity management and role-based access control (RBAC) across all microservices.
- Standardized development and production environments using Docker, reducing environment-related deployment issues and onboarding time.
- Built fully responsive UIs with Angular, Angular Material, PrimeNG, and PrimeFlex, delivering consistent cross-device experiences.
- Engineered automated email notification workflows, improving internal reservation process efficiency and reducing manual overhead.

Full Stack Developer · Creativa Studios *Aug 2023 – Apr 2024*

Stack: TypeScript · Angular · NestJS · PostgreSQL · TypeORM · PrimeNG · PrimeFlex · Zoom API · AWS (S3, SES, Amplify) · GCP · Kubernetes

- Developed and optimized full-stack web applications using Angular and NestJS, improving performance and long-term code maintainability.
- Designed relational database schemas with TypeORM, ensuring data integrity and optimized query performance at scale.
- Integrated AWS services: used S3 for file storage, SES for transactional email delivery, and Amplify for frontend hosting and CI/CD.
- Integrated third-party APIs including Zoom, extending platform capabilities and enabling new product features.
- Managed production deployments on GCP with Kubernetes and also leveraged AWS EC2 for workload hosting, maintaining high availability and uptime.
- Built responsive UI components with PrimeNG and PrimeFlex, improving user experience across devices.

Junior Engineer · Rulesware LLC *May 2022 – May 2023*

Stack: TypeScript · Angular · PostgreSQL · REST APIs · PEGA · Mendix

- Built responsive Angular web interfaces ensuring cross-device compatibility for enterprise clients.
- Consumed and optimized RESTful API integrations, improving data flow between frontend and backend systems.
- Integrated Angular frontend with PEGA backend, streamlining complex enterprise workflows and reducing manual process steps.
- Extended platform functionality by developing and publishing custom modules to the Mendix Marketplace.

Angular Developer · I-Strategies S.A. DE C.V. *Apr 2021 – Aug 2021*

Stack: TypeScript · Angular · Ng-Zorro · Angular Material · REST APIs · MongoDB

- Delivered web interfaces with full CRUD operations using Angular, Ng-Zorro, and Angular Material.
- Built and validated reactive forms for efficient data capture, reducing input errors and improving data quality.
- Managed non-relational databases with MongoDB, optimizing storage structures for application needs.

Technical Support Representative · Concentrix El Salvador — Dell Computers, LACS *2012 – 2021*

Diagnosed and resolved hardware/software issues for consumer and enterprise Dell devices; delivered consistent technical support with strong customer satisfaction metrics.

EDUCATION

Bachelor's Degree in Computer Systems Engineering *2014 – 2021*

Universidad Tecnológica de El Salvador

Specialization: Enterprise Technology Infrastructure Architecture
